

CLASSIC BRASS

JAMESTOWN, NEW YORK

CARE OF FINISHES

Our finishes on solid brass or bronze hardware are created through a series of refined handcrafted finish steps. The protective coating on all of our finishes are either lacquered or wax (i.e living) finishes. The living finishes will naturally age, resulting in a unique patina based on combination of factors including time, climate, environment and level of use. These factors contribute to the changes which will occur in living finishes and are the reason for difference between samples and the ultimate finish.

Care for Wax Finishes

Apply a clear furniture paste wax and let dry. Using a soft cloth, remove the dried wax and shine to level of desired brightness. A soft bristle brush is recommended to remove any excess wax from the low ground or detail (i.e. coin, rope, etc) that may be hard to remove with a cloth.

For best results, paste wax should be applied every 6 months.

Care for Lacquer Finishes

For best results and a lasting finish, we recommend that you maintain lacquer coated products with a mild soap. Rinse and dry thoroughly.

**** All harsh chemicals and abrasives must be avoided.**
